Deploy PHP on Heroku

Mr. Khem Puthea
puthea.khem@gmail.com

The background is a solid blue color. Overlaid on this are three concentric circles of varying shades of blue. The innermost circle is a dark blue, the middle one is a medium blue, and the outermost one is a light blue. They are all centered on the right side of the image, with the text 'php --version' positioned to the left of the innermost circle.

php --version

The background of the image features the Composer logo, which consists of three overlapping circles in shades of blue. The text is centered within the darkest, leftmost circle.

composer --version

Create Account

Install Heroku Command line

Create Project: `heroku create app_name`

Create: composer.json

```
{  
    "require": {  
        "php": "^7.2.0"  
    }  
}
```

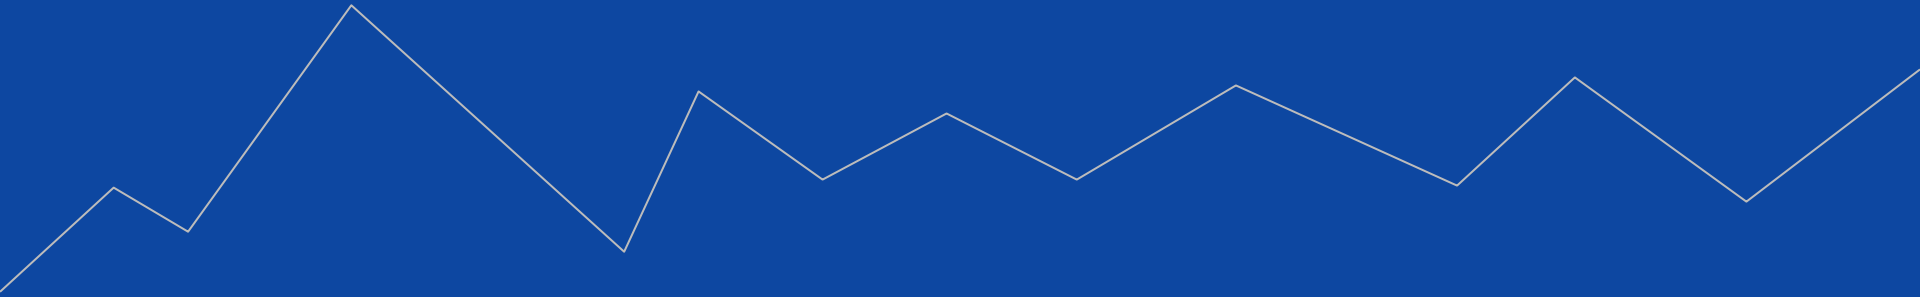

Create: Procfile

web: vendor/bin/heroku-php-apache2 public_html

MySQL Configuration

'mysql://username:password@hostname/database_name?reconnect=true'

Deploy to heroku (every time your code is update)

```
git push heroku master
```

Thanks
